WBCSD panel - **Trade Facilitation for the Circular Economy**

Business Sweden panel - **Pioneer the Possible – from Stockholm to Sharm el-Sheikh and beyond**

Leadership Dialogue 2 – **Stakeholder plenary interventions**

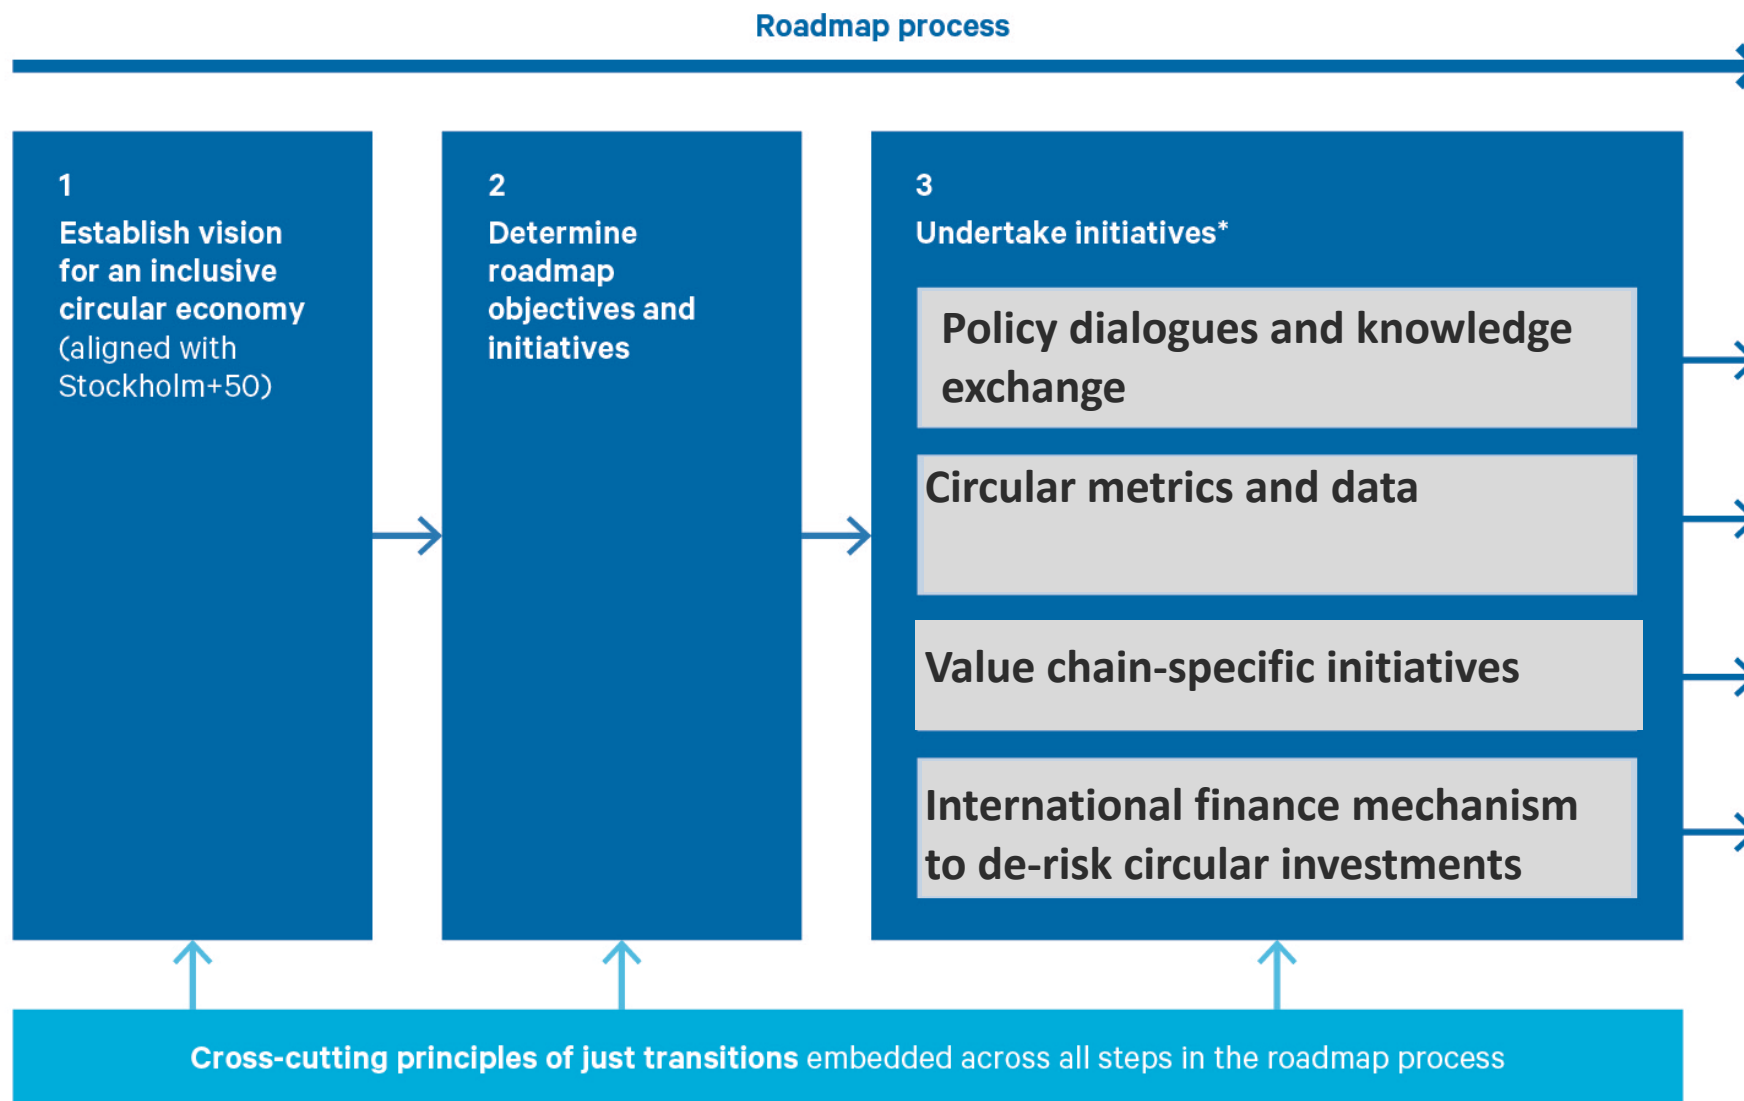

Chatham House panel - **A global roadmap for an inclusive circular economy**

What is the aim of the roadmap process?

- **An open, transparent, voluntary and inclusive space for a cohort of the willing** to work towards a common vision on an inclusive CE and to tackle collective challenges - **not a multilateral process with additional obligations**
- **Offer synergies** with global commitments such as OPN, Paris Agreement and the SDGs in which the circular economy can play a key role
- **Align bottom-up initiatives** of high transformative potential (e.g. by communities and business) with government-to-government coordination on key national policies - in particular, national circular economy roadmaps and action plans – **no top-down measures**

Circular economy roadmap process and structure

* Initiatives presented were identified during international stakeholder workshops and provide a flavour of the type of initiatives that could sit under a global circular economy roadmap. The actual initiatives should be identified during more extensive and inclusive consultation processes as part of the formal roadmap development.

Roadmap participants

50 organisations across the public, private and third sector who will scope and support the global circular economy roadmap process.

Executive committee

10 key organisations whose input will be required for the successful implementation of a global circular economy roadmap process.

Co-chairs

2 governments (1 Global South, 1 Global North) who convene roadmap stakeholder proceedings.

Proposed timeline

Expanding the roadmap stakeholder community and refining the scope of the initiative

Dissemination of roadmap
idea and white paper
@Stockholm+50

Launch of roadmap
initiative and process
E.g. COP27 or WCEF

June 2022

Nov/Dec 2022

Phase 0: Concept identification

February – June 2022

- Identifying the circular economy roadmap concept.
- Developing the initiative rationale
- Launch at Stockholm+50 and gain stakeholder buy-in

Phase 1: Initiative development

July 2022 - Dec 2022

- Scoping the initiative
- Expanding stakeholder participation and ownership
- Preparing launch event
- Raising funds for Phase 1&2

Phase 2: Global roadmap process

2023 - 2026

- Developing a common vision
- Developing the roadmap
- Identifying global CE initiatives
- Mobilizing resources for prioritized CE initiatives

Phase 1: Set-up launch event

Task	June	July	August	September	October	November	December
Hold follow-up bilaterals from Stockholm+50.							
Establish the Executive Committee and project management team.							
Fundraise for Phases 1 & 2							
Recruit co-chairs							
Invite / select the group of 50 roadmap stakeholders							
Stakeholder workshop							
Launch event						Launch @ COP27 or WCEF	

Purpose

- **Highlight CE as an enabler of the climate targets and SDGs**

The roadmap process and declaration is launched at an official side event. This will raise awareness about the role of circular economy in accelerating climate action and SDG implementation.

- **Demonstrate progress**

This will announce to the world that the idea presented at Stockholm+50 is now an inclusive, well-funded and concrete initiative.

- **Expand participation and support**

It will be clear to stakeholders how they can support and engage with the roadmap process.

Desired outcomes

By December 2022:

- A declaration for a global circular economy roadmap process has been signed by at least 50 organisations.
- Funds have been raised for the implementation of the global circular economy roadmap process for the 2023-2026 period.
- The global circular economy roadmap process launch has made international news as a major moment at the 2022 COP27 and/or WCEF.

Thank you for your attention!
