• Botswana: 37%			• Kiribati: 10%	• Morocco: 10%	• Saint Lucia: 10%	• Tajikistan: 10%	• Zambia: 17%
			• Kosovo: 10%	• Mozambique: 16%			• Zimbabwe: 18%
			• Kuwait: 10%	• Myanmar: 44%			

FACT CHECK: The tariffs announced on Trump's "Liberation Day" are so-called reciprocal tariffs. In theory, it means that tariffs are raised to similar levels as other countries impose on imports from the U.S. However, the methodology used by the White House to calculate the size of tariffs to reciprocate has been put into question by many. It seems to be based on the

U.S. trade deficit with the countries in question, but according to the White House it, supposedly, also factors in a combination of tariff and non-tariff factors. These so-called "non-tariff barriers" would include intellectual property rules, environmental and digital regulations, licensing requirements and, in some cases, "corruption."

No one wins in a trade war.

Read more about why this is all just a really, really bad idea at:
